## EDUCATION

### George Fox University

Computer Science, Bachelor of Science

Graduated April 2024

Newberg, OR

## EXPERIENCE

### F5 Networks

Seattle, WA

Software Engineer Intern

July 2024 – September 2024

- Accelerated development process across multiple teams by building a **CI/CD** platform that can investigate a crash from functional tests in 50+ staging and production environments using **GDB** and **Bash** within 8 minutes
- Conducted daily analysis of 5-10 CI/CD pipeline executions, leveraging **GDB** to examine crash dumps and aggregate stack traces and relevant source code from functional test logs into **Bugzilla**, an enterprise bug reporting software
- Expanded knowledge sharing by documenting project scope, deliverables, and milestones in **Jira** and **Confluence**
- Improved test visibility by capturing code coverage reports with line and function hitting for 60 integration tests

### George Fox Enrollment and Marketing Department

Newberg, OR

Software Engineer Intern

August 2021 – April 2024

- Engineered a **monitoring tool** using **Vue** and **NodeJS**, reducing manual verification of content accuracy by 95%
- Achieved a **90%** reduction in manual build time for various tasks time down to 2-4 seconds by developing 20+ user-driven programs in **NodeJS** interacting with the content management system and various public web services
- Optimized branding by redesigning **100+** legacy pages trafficked by **1,000+** users with **JavaScript** and **CSS**
- Increased web accessibility by developing and **A/B testing** 50+ features in a collaborative, cross-functional team

### Liminal Insights, Inc.

Emeryville, CA

Software Engineer Intern

June 2023 – August 2023

- Reduced product configuration time by 80% by building an app with a service-oriented architecture in **Python**
- Optimized battery cell testing process efficiency, offloading **50+** log messages/minute with **ZeroMQ** and pub/subs
- Stabilized uptime and data flow of 100+ **OPC** events, removing race conditions involving **Redis** subscriptions

### Recidiviz, Inc.

San Francisco, CA

Software Engineer Intern

June 2022 – August 2022

- Built an access monitoring tool in **Python**, **Docker**, and **GCP**, reducing **IAM** audit time by 90% across 17 vendors
- Introduced over 10 new security controls and alerts in infrastructure services across 3 disparate cloud environments
- Resolved **200+** product and container vulnerabilities using **CI/CD** with **CodeQL** and **Trivy** for automated scans

### Northwest Natural Energy, LLC

Portland, OR

Security Analyst Intern

May 2021 – August 2021

- Streamlined security protocols by documenting inventory for 20+ in-house software and hardware systems
- Created a **Splunk** dashboard for real-time detection of suspicious logins and tracking pre-success failed attempts
- Revamped enterprise knowledge sharing by overhauling 100+ legacy **SharePoint** files, enhancing process efficiency

## PROJECTS

### TZ Medical - ECG Medical Triage (Group Capstone Project) | SciPy, Tensorflow, Scikit-Learn

- Extracted 8 domain features on over **34,000+** ECG events by developing standalone data processing scripts
- Detected arrhythmia events close to **95%** precision on a **70-80%** confidence interval with **Random Forest**

### Pickabox - Hackathon Team Project | 45+ hours of React and Python development with Google Cloud

- Won 2nd place in Best Design at Sacramento Hacks in 2021
- Implemented Wikipedia API integrations using **Cloud Run** services to develop the article retrieval service

## SKILLS

**Languages:** Python · Bash · Java · C# · JavaScript · TypeScript · C/C++ · Ruby · Scala · SQL

**Frameworks:** React · Node · Vue · Tailwind · Spring · NoSQL · GraphQL · NumPy

**Tools:** Docker · CI/CD · AWS · Google Cloud · Linux · Wireshark · Kubernetes · tcpdump
